### No. 33. Monthly Production Statistics, New South Wales : Quantities of Certain Articles Manufactured and Mined

The following statistics of production are obtained principally by means of returns collected from producers monthly. Annual totals for 1957-58 and earlier years, however, are derived principally from annual factory returns (relating in most instances to the year ended 30th June).

The figures have been revised since last issue on the basis of the annual returns for 1957-58. The figures for the year 1958-59 and for all months from July, 1958 are subject to revision.

## No. 43. Retail Trade : Total Value of Sales in New South Wales

(Adjusted on a basis comparable with the 1952-53 Retail Census)

Statistics for 1948-49 and 1952-53 were compiled from returns supplied by each retail establishment in the State, but statistics for later years are estimates based on returns collected from a representative sample of retail establishments.

Particulars in Table 43 relate to the retail sales of goods (as distinct from services, accommodation, entertainments, meals, etc.) by establishments selling goods at retail from fixed premises (shops, rooms, kiosks, yards), and include the retail sales of establishments principally engaged in wholesale, manufacturing, or servicing activities.

§ From 1st May, 1958, Cobar Municipality and 10.8 million acres of the Unincorporated Area in the Western Division were amalgamated to form Cobar Shire.

§ From 1st January, 1958, Scone Municipality and Upper Hunter Shire were amalgamated to form Scone Shire.

### "Sydney and Suburbs"

On 1st January, 1954, the boundaries of the Statistical Metropolis, as defined since 1933, were extended to embrace the Municipalities of Fairfield and Holroyd and the Shires of Sutherland and Warringah, together with portions of the Municipality of Liverpool and of the Shires of Baulkham Hills, Blacktown, and Hornsby. In Tables 86 and 89, the group "Sydney and Suburbs" differs from the Statistical Metropolis because it includes particulars for the whole of the Municipality of Liverpool and the whole of the Shires of Baulkham Hills, Blacktown, and Hornsby.

## No. 92. Employment in Larger Private Factories, New South Wales

In order to provide a prompt indication of the trend of employment in private factories, a survey of employment in 710 larger privately-owned factories in New South Wales is made each month, by joint arrangement between the Secretary of the Department of Labour and National Service and the Commonwealth Statistician. Approximately half of total factory employment is covered by the collection, the results of which are available one month earlier than the particulars of total factory employment shown in Table 90.

\* For State Awards, the amounts shown to February, 1959 represent the basic wage together with so much of any margin and any further amount necessary to make the minimum wage payable equivalent to 75 per cent. of the basic wage for males. Following the increase in the basic wage to the 75 per cent. equivalent, the amount shown from February, 1959 is the basic wage exclusive of any margin. This change was applied in State Awards from different dates, beginning in March, 1959.

† Increase resulting from judgment of the Commonwealth Arbitration Court of Conciliation and Arbitration.

‡ Quarterly adjustments for movements in retail prices were suspended in September, 1953, in both Commonwealth and State Awards. They were restored in State Awards in N.S.W. in November, 1955.

§ Increase resulting from judgment of the Commonwealth Conciliation and Arbitration Commission.

## No. 95. Export Price Index Numbers, Australia

These index-numbers are compiled from the prices of 20 commodities which normally constitute about 80 per cent. of all exports. For some metals, and for wheat (from July, 1945 to September, 1951), the index of prices is deduced from the average value of current sales or shipments and hence shows some irregularity. In this index the prices of the commodities are weighted by the average annual exports (production in the case of gold) during the three years 1933-34 to 1935-36.

(Base of each section: Average of 3 years ended June, 1939 = 100)

## No. 96. Wholesale Price (Basic Materials and Foodstuffs) Index Numbers

The eighty commodities included in this index are priced in their primary or basic form wherever possible. The prices used have, in the main, been obtained directly from manufacturers and merchants, and, with a few important exceptions, from Melbourne sources. Apart from locally produced building materials and one or two minor commodities, however, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on estimates of the average annual consumption of the commodities in Australia during the years 1928-29 to 1934-35 inclusive.
